

Appendix I: DandikerSerial No. 10/619,766 filed July 15, 2003

col. 6, lines 11-14	"...[t]he outer will comprise from 20 to 85% w/w of a pH independent hydrophilic polymer, preferably hydroxypropylmethyl cellulose, e.g. 20 to 40% w/w."
Example 1 (col. 11, lines 15-41)	(i) 59% w/w microcrystalline cellulose in tablet core and (ii) 35% w/w hydroxypropyl methylcellulose and 40% w/w microcrystalline cellulose in outer layer
Example 2 (col. 11, line 60 through col. 12, line 10)	(i) 59% w/w microcrystalline cellulose in tablet core and (ii) 77% w/w hydroxypropyl methylcellulose and 12% w/w microcrystalline cellulose in outer layer
Example 3 (col. 12, lines 20-29)	35% w/w hydroxypropyl methylcellulose and 40% w/w microcrystalline cellulose in outer layer
Example 4 (col. 12, lines 40-57)	(i) 64.72% w/w microcrystalline cellulose in tablet core and (ii) 30% w/w hydroxypropyl methylcellulose and 43% w/w microcrystalline cellulose in outer layer
Example 5 (col. 12, line 64 through col. 13, line 5)	30% w/w hydroxypropyl methylcellulose and 43% w/w microcrystalline cellulose
Example 6 (col. 13, lines 10-26)	first active composition including 70% w/w hydroxypropyl methylcellulose and 17% w/w microcrystalline cellulose; second active composition including 70% w/w hydroxypropyl methylcellulose and 12% w/w microcrystalline cellulose

BEST AVAILABLE COPY

Example 7 (col. 13, lines 30-43)	core tablet according to Example 1 and coated with polymer matrix layer according to Example 6
Example 8 (col. 13, lines 45-60)	74.4% w/w hydroxypropyl methylcellulose and 11.6% w/w microcrystalline cellulose in core tablet coating
Example 9 (col. 13, line 63 through col. 14, line 14)	See Example 1
Example 10 (col. 14, lines 15-45)	(i) 23% w/w microcrystalline cellulose in tablet core and (ii) 35% w/w hydroxypropyl methylcellulose and 40% w/w microcrystalline cellulose in intermediate polymer layer
Example 11 (col. 15, lines 5-30)	(i) 23% w/w microcrystalline cellulose in tablet core and (ii) 35% w/w hydroxypropyl methylcellulose and 40% w/w microcrystalline cellulose in polymer layer
Example 12 (col. 15, line 54 through col. 16, line 11)	(i) 4% w/w polyvinylpyrrolidone in tablet core and (ii) 23% w/w hydroxypropyl methylcellulose and 40.6% w/w microcrystalline cellulose in outer layer

BEST AVAILABLE COPY

Example 13 (col. 16, lines 25-40)	See Example 1
Example 14 (col. 16, lines 44-66)	(i) 4.5% w/w polyvinylpyrrolidone in tablet core and (ii) 35.0% w/w hydroxypropyl methylcellulose and 40.0% w/w microcrystalline cellulose in outer layer
Example 15 (col. 17, lines 15-40)	(i) 4.5% w/w polyvinylpyrrolidone in tablet core and (ii) 33.3% w/w hydroxypropyl methylcellulose and 38.1% w/w microcrystalline cellulose in outer layer
